INTER-OFFICE CORRESPONDENCE

DATE: May 24, 1973
MEMO TO: C. E. Clark
FROM: R. Van Someren ✓
SUBJECT: WILL COUNTY - LPC
Rockdale/Bennett

On the above date I inspected the subject site. The site continues to remain closed, however, final cover has not yet been applied. Final cover will be applied in the near future. According to Mr. Bennett, a man has been contracted to do the work as well as to clean up the barrel salvage yard which is located next to the previous fill area.

Leachate was also observed at the site and flowing towards and into an adjacent farm field south and west of the Bennett site. The leachate was observed to be entering the farm field which is owned by Mr. Bennett and seeping into the ground. Mr. Bennett indicated that the field is to be plowed and seeded. The potential for polluting any surface waters in the area are minimal, however, the potential of polluting the ground water is more substantial. Next time I visit the site I will attempt to collect some samples of the leachate.
